

# VERTEX ANTENNENTECHNIK GmbH

A GENERAL DYNAMICS COMPANY

## SOFTWARE DEVELOPER, ENGINEER/TECHNICIAN (m/f)

We are a worldwide supplier of High End Antenna Systems and Radio Telescopes. For our control systems group we are looking for engineers or technicians with a focus on software development.

### Your tasks:

- Programming of our control systems (C/C++, XML, HTML)
- Device and interface tests
- Commissioning and testing of our systems (worldwide)

### Your qualification:

- Degree in computer science/engineering, electrical engineering or science, or other substantiated education in programming
- Programming skills in C/C++
- Experience with Linux operating systems would be beneficial

### What we offer:

- A versatile, interesting and challenging job in a high tech company
- Work in a highly motivated team
- Travel to interesting locations worldwide
